DEMANDS FOR STEEL **INCREASE GREATLY**

Shipbuilding Not Suffering for Product as Much as Other War Industries.

PERSHING ORDERS HEAVY

Railroad Operations in France Require Thousands of Tons for Cars of All Kinds.

Special Despatch to Tan Sex. PITTSEURG, Aug. \$1.—Some time ago it was noted that Charles M. Schwab's request for an increased allotment of plates for shipbuilding purposes was refused by the War Industries Board, who held that the 50,000 tons of plates a week was all that could be spared from the war programme of the Government. The equity of this refusal is easily seen now that it is known that the war needs are increasing hugely, and the pressure for steel in so many directions shows no letup. It is said that over a million tons of plates have been delivered to the shipyards and have not yet appeared in any of the vessels constructed. While a good deal of steel is lalways in transit and some in process
of fabrication, it is believed that by
careful distribution the reserve of 1,100,000 tons of plates will take care of
the urgent needs of the shippards, added
to the 50,000 tons coming in every week.
The amount mentioned in the last named
figures will take care of 750,000 deadweight tons a month, and as launchings
last month amounted to 433,244 tons
deadweight, it is easily seen that there
is no problem to solve in the shipbuilding programme such as faces the War
Industries Board in other lines.
Railroad operations in France are
bringing in heavy orders every week,
the latest of which is for 20,000 thirty
ton standard gauge cars and 5,000 naryet appeared in any of the vessels con-

DIVIDENDS AND INTEREST.

CENTRAL OF GEORGIA RAILWAY CO. First, Second and Third Preference Income Bonds.

Savannah, Ga., September 2, 1918.
Full interest for the twelve months ended June 20, 1918, being 5% on the First, Second and Third Preference Income Bonds of Central of Georgia Railway Company will be paid by Guaranty Trust Company of New York and by Chatham Bank & Trust Company of Savannah, Ga., October 1, 1918.

CHAS, F. GROVES, Treasurer.

\$241,854,420 GIVEN of steel, the important uses will sat it all up, and even these sanctioned ave-nues of use will be closed to orders.

New Tactics Change Specifications. McAdoo Declares Most of the

Standard Rentals Have

Been Paid.

Special Despatch to Tax Stx.

Washington, Sept. 1.—Nearly a quarter of a billion dollars has been advanced to the railroads of the country since April 1, the Railroad Administration, and has been applied to sixty-four different roads and systems. This amount is in addition to the current earnings of the roads applied directly to their current expenses.

The statement was made to-day that the Director-General "deaires to correct currents are harden to the processing of the roads applied directly to their current expenses.

The statement was made to-day that the Director-General "deaires to correct currents are noticed in the orders coming from the Government that the change in fighting tactics on the western from the Government that the change in fighting tactics on the western from the Covernment to have altered many specifications, as the different war requirements is now on, while large outers to connection with field kitchens have been placed. In two of the Pittsburg mills the rolling of chell rounds has been substituted for the manufacture of small billets for wire rods, and other curtaliments are happening to some other finished steel products to provide larger supplies for the more essential war needs.

No definite estimates are yet available as to the probable timplate production in August, but the common view has been that it would run somewhat below the July production of 3,114,000 boxes. That was considered a very remarkable record for the month, and on the whole August weather has been more unfavorable than that of July. There remain very considerable requirements to be filled in connection. It has been noticed in the orders com-

the Director-General "desires to correct an impression which prevalls in some quarters to the effect that the United some of the mills are getting close to noiding or has been withholding the standard rentals due to the various railroads under Government control pending the execution of the contracts between the railroads and the Government, and that omission of any railroad corporations to settle its debts or claims is due to any omission by the Railroad administration to pay the accrued rentals."

Most of the Rentals Paid.

As a matter of fact, it was pointed out, most of the rent of the standard rentals for the first eight months of this year—about \$65,000,000—already has been paid to all of the companies under federal control. In many cases, in addition to paying the 30 per cent. of the rentals (which, is permissive and not compulsory) the Government has advanced large additional sums to enable roads to meet maturing bond issues and to pay for new equipment, additions and betterments. The total amount of money paid to the roads from the revolving fund and from earnings is estimated at between \$800,000,000 and \$900,000,000.

More than half of the quarter billion has been advanced to three systems

mated at between \$800,000,000 and Spoo,000,000.

More than half of the quarter billion has been advanced to three systems alone, the New York and New Haven Railroad, which received \$46,964,000:

Railroad, which re

Jay says:

"The industry is in an unsettled state, with somewhat opposite conditions obtaining as to supply of raw materials in the wool and cotton trades. A tendency appears to exist among manufacturers and distributers, to await full laste of forcement price regulations before de-Government price regulations before de-Government price regulations before de-termining trade policy. With importa-tion of wool, exclusively on Government account, it seems not improbable that the supply will be inadequate to permit the manufacture of pure wool fabrics for civilian trade, but as sufficient stocks of cloth for the near future are in the 131.9 17 334 10 192 Pet. 114 of cloth for the near future are in the hands of merchants, they hesitate to contract for mixed goods. Trading in cotton goods is also light, owing to uncertainty as to how Government established prices for certain classes of goods affect the prices of others, and to expectations on the part of buyers, of lower prices, and to preference, by the mills, for large scale Government orders for goods of homogeneous character."

Mr. Jay says unskilled labor is reported to be slightly less acute, and the turnover diminished, largely as a result of Federal supervision of employment, but that the demand for labor above the completely unskilled grade and especially +1 completely unskilled grade and especially for men with some training along me-chanical lines, is very keen. Collections in the Second Federal Re-MINING. serve district are declared by Mr. Jay to be uniformly good.

New England Stock Sales.

State-Awaits Government

Pierre Jay, chairman of the Federal Reserve Bank of New York, in a review

of trade conditions, declares the increas-

ing production, so that the less essential

industries are of necessity being forced

to adjust themselves to the scarcity of

steel and similar fundamental materials.

Mr. Jay says only approximately 5 per

cent, of the total supply of copper is said

to be available for other than war purposes and that tin is at almost prohibi-

tive prices.

Discussing the textile business, Mr.

Price Fixing.
